Kuvaus

With the global markets disrupted with current world events, finding reliable partners for business is all the more topical. We will hear the latest on US economy and politics, on support services directed to Finnish companies considering exporting to the US, and experiences of both SMEs and larger companies on operating in the US.

The event will be held hybrid, with the opportunity to either follow the event online or on site at the Helsinki Region Chamber of Commerce facilities. Online attendants will be able to take part in the discussion through a chat.
