The strategic sectors for investing in Spain are currently: chemistry; information and communications technologies (ICT); environment; water and water treatment; health sciences; biopharmaceuticals and biotechnology; aeronautical engineering; the automotive industry; logistics; and energy.

Spanish regions have their own cultures and some even have their own official languages, such as Catalan, Galician, Basque, and Valencian. Notably, Spaniards identify strongly with their home region and even with their specific province of origin

The event is co-organized by Enterprise Europe Network, the Finland Chamber of Commerce, Helsinki Region Chamber of Commerce, Spanish-Finnish Chamber of Commerce, and Team Finland Spain.
