in English and Finnish

18.30

End of the event

The companies have a possibility to book an appointment (one-to-one meeting) with the FinnCham representatives based in the USA through the registration link, and they will be contacted with a proposed date and time afterwards.

The Finnish American Chamber of Commerce of the Southeast, Inc. (FACCSE) was organized in 1981. Our mission is to promote and foster

trade, professional interests, and commercial relations between Finland and the Southeastern United States. Our headquarters is in Atlanta, GA. Our current membership includes companies in the industrial sector (e.g., pulp & paper, chemical, manufacturing) and in software and wireless services, to mention a few. We also have a strong educational and legal footprint on our current board. The Southeastern US is a great place to do business due to relatively low taxes, lack of bureaucracy, and affordable cost of living. Atlanta's Hartsfield-Jackson Airport is the world's busiest airport, with multiple flights a day to and from all over Europe. Major interstate highways go through the city, providing convenient road access to all over the East Coast.

Finnish American Chamber of Commerce in Washington DC The Finnish American Chamber of Commerce in Washington DC is a unique mix of members who are active in business and related organizations (the World Bank and similar institutions) combined with service professionals (lawyers, lobbyists, accountants, and consultants) who have extensive experience in Finland-USA transactions, both public and private. The Washington Chamber's focus is primarily on commerce, to avoid overlap with groups who otherwise serve the local Finnish-American community's social and cultural needs (the Embassy of Finland, the Finlandia Foundation, and others). Chamber events are often coordinated with the Embassy, such as luncheon programs about trade-related topics timed with industry and government delegation visits from Finland.

Finnish American Chamber of Commerce Great Houston Finnish American Chamber of Commerce Greater Houston, The FACC Greater Houston is an organization dedicated to promoting commercial relations between Houston and Finland. The Chamber's main role is to provide a forum for members to network and exchange business ideas and experiences through social, cultural, and educational activities. The FACC Greater Houston also aspires to reach out to other European Chambers of Commerce within Houston and across the US. The City of Houston, the fourth most populous U.S. city after NY, LA and Chicago. 1.7 M Houstonians or roughly 1 in 4 were born outside the U.S. Metro Houston has the 3rd largest number of Fortune 500 companies in nation. If Houston were a country, it would rank as 25th largest economy in the world, exceeding Thailand, and Ireland. Houston is home to more than 9,100 tech-related firms including more than 1,000 venture backed startups. The largest industries in Houston, TX are Health Care, Construction and Retail Trade and the highest paying industries are Mining, Quarrying, & Oil & Gas Extraction, Agriculture, Forestry, Fishing & Hunting, & Mining, and Management of Companies & Enterprises.

The event is part of the Internationalisation Week of the Chambers of Commerce in Finland. [Read more.](#)
